

# idWhere© Inventory Management System

**idWhere© Inventory Management System** is an Enterprise software solution for “Advanced Pharmacy, Laboratory, Hospital, and standard product Inventory Management”. idWhere takes advantage of barcode and RFID technologies to provide inventory accuracy and performance, while complying with HIPAA regulations. idWhere’s Alerting system keeps everyone up to date via on-screen notifications, email, email-to-SMS, SNMP and more. idWhere offers an easy-to-use web browser interface for managing inventory, performing administration tasks, reporting, and much more.

idWhere uses the latest in 2D barcode and RFID technologies to be able to store and capture the item number, lot number, expiration date, quantity and packaging type in a single scan. The labels also identify the user

that created the barcode and the full description of the product.

RFID tags are used to track the addition and removal of medical devices, vaccinations, mobile lab equipment, and to assist with billing and the tracking of patient care by monitoring which products are still on the shelf, which products have gone to what

patients, and when they were provided.

- Pharmaceutical Regulatory Compliance
- Process Automation, system directed replenishment and allocations with regard to orders with high priority
- Immediate Reporting on all facets of your Inventory
- Increased Inventory and Picking accuracy
- A system independent of human factor
- And Accountability across the Board...

### **About Xiacon**

Xiacon, Inc., a private corporation founded in 2000, is a computer hardware services and software systems developer of compliance based solutions for the Mortgage Banking, Pharmaceutical, Health, and the Educational sectors. Our idMonitor© Environmental digital product line monitors refrigeration and freezer units, computer rooms, data centers, and other facilities for the conditions: temperature, humidity, power, flood/water, smoke/fire, air flow, room entry, motion, cameras & more. Alerting, logging and graphing are standard for all models. Automatic corrective actions resolve issues for a lights-out response, allowing 'Disaster Prevention' instead of 'Disaster Recovery'. Our idWhere© Inventory and Assets Management solutions utilize barcode and RFID technologies to properly manage your inventory and assets throughout your core facilities. Xiacon's products are available worldwide from professional IT & facilities resellers. To learn more about any Xiacon product, visit us online at [www.xiacon.com](http://www.xiacon.com) or call us at 631-300-3500.
